

College of Arts & Sciences

*Congratulations, Alimoor
Thanks for all you do!*

Alimoor Reza

Assistant Professor of computer science and artificial intelligence, Department of Math & Computer Science

Recommend promotion to associate professor with tenure

Teaching

- Introductory and advanced courses in computer science, programming, and machine learning.
- Reflective practitioner who has worked with his colleagues and has established himself as a highly effective and successful teacher.
- Exemplary commitment to mentoring students and in supervising undergraduate research projects that have led to external funding, awards, and student conference participation.
- His teaching philosophy shows his dedication to student success.
- Students appreciate his care and concern for their education and indicate he communicates complex ideas in a way that facilitates their learning.

Scholarship

- External reviewers find his scholarship contributions impressive and robust, and demonstrate a clear and consistent trajectory of high-quality research, effective student mentorship, and collaborations that have had great impact.
- The range of scholarly activities include peer-reviewed publications, three grants, developing new courses and making them publicly available, and patent applications.
 - Alimoor has been awarded two US patents.
- His commitment to undergraduate research is outstanding, having mentored multiple students in work of significant computational and mathematical depth, making it accessible.

Service

- Instrumental in the successful launch of the dual degree partnership in the Qingdao – Drake United College; part of the first delegation to travel to Qingdao, and one of the inaugural faculty cohort members in fall 2025.
 - Alimoor's enthusiasm and collegiality for the program has been an important contribution to the changing culture of faculty acceptance of international partnerships.
